Aspire Vero

NATIONAL GEOGRAPHIC EDITION

Become a champion of change and support the innovation of sustainably-minded products.

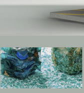
START TODAY

At Acer, we do everything with the Earth in mind and strive to increase the awareness of conscious exploration, research, and education. To learn more, visit natgeo.com/info.

Windows 11 | POST CONSUMER RECYCLED | intel CORE i7 | VeroSense™

For Planet Earth

Our sustainably-minded laptop is made with post-consumer recycled plastic. The topographical detailing inspires conscious consumption by reminding us of our highest priority: planet Earth.

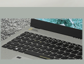


Post-Consumer Recycled (PCR)

Made from post-consumer resins, PCR plastics are eco-friendly, more sustainable, and reduce landfill waste.

30% PCR Materials

From our top and bottom cover, screen bezel, and operating surface, we save around 21% in CO2 emissions.[1]



50% PCR Keycaps

Our commitment to reducing waste even extends to our keycaps.

100% Recyclable Packaging

Choose to recycle or reuse with the special edition box and full-functioning mini laptop[2] stand just a few folds away.

Up to 85% Recycled Paper

Is used to make the Aspire Vero's packaging box.

100% Recycled Plastic

Is used to make the laptop bag and keyboard sheet.

Paper Sleeve

Is the result of working with our vendors to replace the charger's plastic bag.

Evolution

Designed to adapt to the planet's needs with easy disassembling for easy recycling. Meaning your device still does good even after purchasing.

Upgradable Laptop

For easy repairs, upgrades and recycling, we use standardized screws.

Paint-Free

The paint-free chassis[4] lowers the negative impact of VOCs.

Reduce, Reuse, Recycle

Signature R and E keys echo our sustainability goals.

Switch to Eco+

Take control of your energy efficiency with VeroSense™, our smart battery management app.
